Leica Viva GNSS GS10 receiver

Datasheet

Proven GNSS Technology

the Leica GS10 delivers the hallmarks of Leica GNSS – reliability, availability and accuracy.

- Built on years of knowledge and experience,
 Leica SmartCheck RTK data-processing to guarantee correct results
 - Leica SmartTrack advanced four constellation tracking guarantees most accurate signals
 - Leica xRTK delivers more positions in difficult environments

Unlimited Series

The Leica GS10 Unlimited is your safe investment for the future.

- Future proof lean back and observe GNSS modernisation with future proof hardware
- SmartLink bridges RTK communication gaps up to 10 minutes
- GPS, Glonass, Galileo and BeiDou provide maximum performance. Additional support of BeiDou only and Glonass only positioning.

Rugged

The Leica GS10 is built for the most demanding environments.

- IP68 protection against dust and continuous immersion
- Built for extreme temperatures of -40° C to +65° C

Leica GS10 GNSS Receiver					
Hardware	Weight & Dimensions				
-	Weight (GS10)	1.20 kg			
	Weight	5.40 kg standard RTK backpack rover including GFU RTK device, controller, batteries, pole and bracket			
	Dimension (GS10) 212 mm x 166 mm x 79 mm				
	Environmental Specifications				
	Temperature, operating	–40° C to +65° C, compliance with ISO9022-10-08, ISO9022-11-special, MIL STD 810G Method 502.5 II, MIL STD 810G Method 501.5 II			
	Temperature, storage	-40° C to +80° C, compliance with ISO9022-10-08, ISO9022-11-special, MIL STD 810G Method 502.5 I, MIL STD 810G Method 501.5 I			
	Humidity	100%, compliance with ISO9022-13-06, ISO9022-12-04 and MIL STD 810G Method 507.5 I			
	Proof against: water, sand and dust	IP68 according IEC60529 and MIL STD 810G Method 506.5 I, MIL STD 810G Method 510.5 I and MIL STD 810G Method 512.5 I Protected against blowing rain and dust Protected against temporary submersion into water (max. depth 1,4 m)			
	Vibration	Withstands strong vibration during operating, compliance with ISO9022-36-08 and MIL STD 810G Method 514.6-Cat.24			
	Drops	Withstands 1.0 m drop onto hard surfaces			
	Functional shock	40 g $/$ 15 to 23 msec, compliance with MIL STD 810G Method 516.6 l No loss of lock to satellite signal when used on a pole set-up and submitted to pole bumps up to 150 mm			
	Power & Electrical				
	Supply voltage	Nominal 12 V DC			
	Power consumption	Range 10.5 – 28 V DC Typically: 3.2 W, 270 mA			
	Internal power supply	Recharge & removable LI-Ion battery, 6 Ah / 7.4 V, 2 batteries fit into receiver			
	Internal power supply,	15.00 h receiving RTK data with standard radio ⁵			
	operation time	13.00 h transmitting RTK data with standard radio ⁵ 14.00 h RTK via GSM / GPRS connection ⁵ Using 2 internal batteries			
	External power supply	Rechargeable external NiMh battery 9 Ah / 12 V			
	Certifications	Compliance to: FCC. CE			
		Local approvals (as IC Canada, C-Tick Australia, Japan, China)			
Memory & Data Recording	Memory				
	Memory medium	Removable SD card: 1 GB			
SDI	Memory medium Data capacity	1 GB is typically sufficient for about GPS & GLONASS (8+4 satellites)			
SD	Data capacity				
SD		1 GB is typically sufficient for about GPS & GLONASS (8+4 satellites)			
	Data capacity Data Recording	1 GB is typically sufficient for about GPS & GLONASS (8+4 satellites) 280 days raw data logging at 15 s rate Onboard recording of: Leica GNSS raw data			
	Data capacity Data Recording Type of data	1 GB is typically sufficient for about GPS & GLONASS (8+4 satellites) • 280 days raw data logging at 15 s rate Onboard recording of: • Leica GNSS raw data • RINEX data			
	Data Capacity Data Recording Type of data Recording rate	1 GB is typically sufficient for about GPS & GLONASS (8+4 satellites) • 280 days raw data logging at 15 s rate Onboard recording of: • Leica GNSS raw data • RINEX data Up to 20 Hz			
User Interface	Data capacity Data Recording Type of data	1 GB is typically sufficient for about GPS & GLONASS (8+4 satellites) • 280 days raw data logging at 15 s rate Onboard recording of: • Leica GNSS raw data • RINEX data			
	Data Capacity Data Recording Type of data Recording rate	1 GB is typically sufficient for about GPS & GLONASS (8+4 satellites) • 280 days raw data logging at 15 s rate Onboard recording of: • Leica GNSS raw data • RINEX data Up to 20 Hz • ON / OFF button			
	Data Capacity Data Recording Type of data Recording rate Buttons	1 GB is typically sufficient for about GPS & GLONASS (8+4 satellites) • 280 days raw data logging at 15 s rate Onboard recording of: • Leica GNSS raw data • RINEX data Up to 20 Hz • ON / OFF button • Function button Function button: • Easy switch between Rover / Base mode			
	Data Capacity Data Recording Type of data Recording rate Buttons Button functionality	1 GB is typically sufficient for about GPS & GLONASS (8+4 satellites) • 280 days raw data logging at 15 s rate Onboard recording of: • Leica GNSS raw data • RINEX data Up to 20 Hz • ON / OFF button • Function button Function button: • Easy switch between Rover / Base mode • Easy "Here" positioning functionality			
User Interface Communications	Data Capacity Data Recording Type of data Recording rate Buttons Button functionality Led status indicator	1 GB is typically sufficient for about GPS & GLONASS (8+4 satellites) • 280 days raw data logging at 15 s rate Onboard recording of: • Leica GNSS raw data • RINEX data Up to 20 Hz • ON / OFF button • Function button Function button: • Easy switch between Rover / Base mode • Easy "Here" positioning functionality Bluetooth®, position, RTK status, data logging, detailed power status Integrated web interface functionality provides full status indicator and configuration options 2 x serial RS232 Lemo 1 x USB / RS232 Lemo 1 x Spin Lemo external power

- ¹ The Unlimited series has free future upgrade to 500+ channels.
- ² Support of QZSS is incorporated and will be provided through firmware upgrade.
- ³ Measurement precision, accuracy and reliability are dependent upon various factors including number of satellites, geometry, obstructions, observation time, ephemeris accuracy, ionospheric conditions, multipath etc. Figures quoted assume normal to favourable conditions. Times required are dependent upon various factors including number of satellites, geometry, ionospheric conditions, multipath etc. A full BeiDou, Galileo and GPS L5 constellation will further increase measurement performance and accuracy.

 4 Might vary due to atmospheric conditions, signal multipath, obstructions, signal geometry and number of tracked signals.
- ⁵ Might vary with temperatures, age of battery, transmit power of data link device.

Whether you want to stake-out an object on a construction site or you need accurate measurements of a tunnel or a bridge; whether you want to determine the area of a parcel of land or need the position of a power pole or to capture objects for as-built maps – you need reliable and precise data.

Leica Viva combines a wide range of innovative products designed to meet the daily challenges for all positioning tasks. The simple yet powerful and versatile Leica Viva hardware and software innovations are redefining state-of-the-art technology to deliver maximum performance and productivity. Leica Viva gives you the inspiration to make your ambitious visions come true.

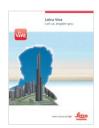

When it has to be right.
