

# GP-8921SG

( Electric motor type ) 4V4H8 Dots with super brightness

**NEW** The newest line laser level instrument

**P** Line with dot

Battery power switch ( the power is off automatically when it is not used within 1 minute )

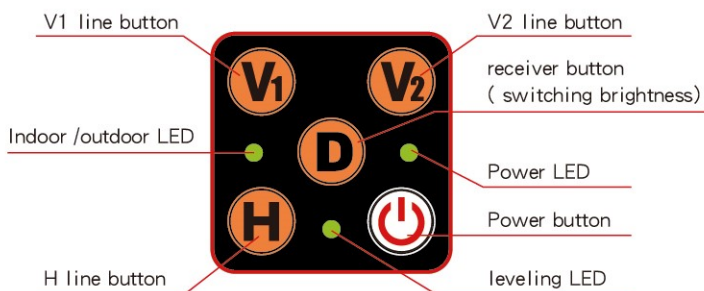

Battery power is off when it is long pressed for 2 seconds.

Blue LED means power display and red LED means battery switch.

### Charging method

Lithium battery should not be left without electricity for a long time to avoid damage.

### Features

1. BSMI-certified 18650 lithium battery ( 2600 mah ) and AC power ( 8.4V 1A & 5V2A ) for interaction use. That provides with the multiple power supply.
2. 2 levels brightness switching.
3. With the aid of laser dots , The outdoor construction becomes faster.
4. The electrical leveling system is stable and not influenced by the vibration in the high-rise buildings.

### Specification

Model	GP-8921SG ( 4V4H8P )
Laser class	Class 2 ( Sharp 30 MW true green beam )
Water proof grade	IP-54
Accuracy	±1mm/ 7M
Leveling range	±3.5 Degree
Power output	5V 2A DC or lithium battery
Continuous working time ( with all laser lines on )	about 4 hours ( lithium battery as an example )
Tripod screw	5/8 "
Operation Temp	-10°C~+45°C
Dimension /weight	110 X205 mm , 2.5KG ( with battery )
Leveling system	Electric motor type
Fine adjustment range	360 degree

### Accessory includes

Various wall mounts

L - shaped target plate

Receiver

IP-56

Various tripods

- 180cm
- 165cm
- 145cm
- 26cm
